

PREFACE

The 7th International Symposium on Carotenoids would not have been possible without the help of many organizations and individuals. In this respect, the Symposium Organizers thank the International Union of Pure and Applied Chemistry, under whose good auspices the meeting was held. Particular thanks are due to Mr P.D. Gujral (Executive Editor, Pure and Applied Chemistry) for his patient cooperation with the Symposium Editors in the publication of this Volume, which contains all the invited lectures.

The success of the Symposium was heavily dependent upon sponsorship and generous financial support by the following:

Deutsche Forschungsgemeinschaft
The University of Munich
F. Hoffmann-La Roche & Co. AG, Basel, Switzerland
BASF AG, Ludwigshafen, FRG

Their contributions are acknowledged with considerable gratitude.

The Local Organizers received valuable support and much encouragement from the International Organizing Committee and also from Dr George Britton and from Dr Brian H. Davies.

As Chairman of an International Symposium held in my own Institute, I am conscious of the consequent burden carried by my colleagues in the Botanical Institute of the University of Munich. I therefore wish to thank most warmly all staff members of the Institute for their help and forbearance. I am especially appreciative of the support I received from my own co-workers, both for their stimulating and creative ideas during the planning of the Symposium, and for their very hard work while it was in progress.

I have welcomed the collaboration of Dr Brian H. Davies in editing this Volume. It was he who spent many hours, both during our Symposium and subsequently, reading all the manuscripts and suggesting a few amendments. Both he and I would like to thank our participating authors for their cooperation not only in providing, within a reasonable time, camera-ready manuscripts of an appropriate length, but also for complying so readily with our other editorial stipulations.

This Volume stands as a record of the 7th International Symposium on Carotenoids, which took place in Munich, FRG, 27th-31st August 1984. The 8th meeting in the series will be in Boston, USA, in 1987.

W Rau
Chairman, Organizing Committee
