IUPAC | CCCE 2021 Itinerary - How to plan and schedule your conference

The first step here is to go onto the CCCE section of the cheminst.ca website and click on Program > View the scientific program.
Once you are on the program you want to select “My itinerary”.

Click on “Login to create or retrieve library”.
After you have logged in, you can click through the various days of the schedule and select the presentations that appeal to you.

Once you have selected a presentation you will get a popup window. Simply click “Add To My Itinerary” and it will be saved in your custom itinerary.
You can view your itinerary at any time by clicking “My itinerary” and it will take you to the schedule you have created for yourself.

Below is a screenshot of a sample itinerary with a session added.

Once the conference begins and the program goes live, the schedule you create here will be moved over to the live program automatically.
Please email CCCE@cheminst.ca with any further questions, comments, or concerns so that we can assist you further.
