\*NC comments (May 19): There are still three members proposed from the countries already represented by TMs and AMs: Sophie (France), Danniebelle (USA), and Adriana (Czech). All these three ladies have a long track-record with the division, they represent strong positions in the national chemical sciences (Sophie), industry (Danniebelle) and strengthening the national position (Adriana). Hence, they are key-people for the division with whom I wish to cooperate in the next biennium in the position of a division president, as are those in the TM and AM positions from the same countries.
