

ASSOCIATION OF GREEK CHEMISTS

Kaningos 27 Athens Greece / www.eex.gr

The Association of Greek Chemists (Greek: Ένωση Ελλήνων Χημικών, EEX) is the chemical society of Greek chemists. The Association of Greek Chemists is a public legal entity that reports to the Ministry of Industry, Energy and Technology.

MISION

It was founded in 1924 in order to act as the Greek government's official advisor on Chemistry related issues.

HISTORY

In 1900, the first Greek Analytical Laboratory was founded at Chania, Crete. The Chemistry Department of Athens University and the Chemical Engineering department of the National Technical University of Athens, were founded in 1918. Six years later, Zoe Mela (Macedonian fighter Pavlos Melas' daughter) wrote the Association of Greek Chemists' founding declaration together with nine more chemists on 31 March at her house (17 Asteriou street, Athens). It was then signed by 53 chemists from the Universities and the Rousopoulos Academy on 4 August 1924

MAIN ACTIVITIES

ORGANIZATION

The Association of Greek Chemists (AGC) is the only scientific organization that legally represents the Greek chemists in state committees in the country and abroad. It is structured in ten peripheral branches that cover the whole country and several scientific working groups.

RESOURCES

The Association of Greek Chemists (AGC) has approximately 14,000 registered members who are all university graduates
