

*What does a fair research and publishing landscape look like?  
We want to hear your thoughts at the*

## WILEY-VCH Breakfast Symposium

# Empowering Women in Chemistry

Wednesday, 12 February 2020, in Weinheim  
From 9.30 am to 12.30 pm

Wiley-VCH is proud to host this special event at our editorial offices, in conjunction with the IUPAC100 Global Women's Breakfast and the GDCh.

Guest speakers Professors Sonja Herres-Pawlis (RWTH Aachen), Doris Kunz (Universität Tübingen), Ulrike Kramm (TU Darmstadt), and Dr. Hildegard Nimmesgern (Frankfurt) will share their unique perspectives as a basis for stimulating discussion.

Video messages from female researchers worldwide will also be broadcast. Most importantly, we want to hear from you.

- *Have you wondered why the majority of speakers at conferences are men?*
- *Why are there so few female Professors of chemistry?*
- *Is it challenging to have a career in academia and be a mother?*
- *Do you perceive a gender bias in publishing?*

Our goal is to empower the next generation of women in chemistry. Join us – all are welcome to discuss key challenges for female chemists.

**Registration extended to 3 February 2020: [bit.ly/ewc2020](https://bit.ly/ewc2020)**

The event is free of charge for all attendees and breakfast will be provided.
